About Me :

Web Developer skilled in building scalable web applications using React, Node.js, Express, and MongoDB. Passionate about developing efficient, user-friendly solutions with a focus on clean code, performance, and continuous learning.

Personal Projects :

React-based Chatbot UI project

Developed an interactive chatbot interface using React.js with dynamic user–bot messaging, asynchronous responses, and auto-scrolling chat history. Implemented clean UI design, keyboard shortcuts (Enter/Esc), and state management using React Hooks for a smooth, real-time chat experience.

Ecommerce website

Developed a responsive single-page website using React.js, featuring a clean and modern UI with reusable components. Implemented state management using React Hooks and ensured smooth user interaction through dynamic rendering. Focused on component-based design, maintainable code, and responsive layout for an enhanced user experience..
